# 180 MW Renewable Energy Project by Greenko Group

## Solar park in Madhya Pradesh to meet rising electricity demand

This project activity is a large-scale solar project. The project is promoted by Greenko Group and there are six SPVs of 30 MW each, making a total of 180 MW. The main investor is SEI Sunshine Power Pvt Ltd, which is the project participant for the project activity.

The power supply in the surrounding area is improved, which has a positive impact on the economy and lifestyle in the region.

[For more information please click here.](#)

The project replaces approximately 327,729 MWh/year of electricity from the generation mix of power plants connected to the Indian grid, which consists mainly of thermal or fossil fuel based power plants. The project activity creates permanent and temporary employment opportunities in the vicinity of the project.

## Overview of the project data:

## 180 MW Renewable Energy Project by Greenko Group

The project contributes to the following sustainability goals:

### Affordable and clean energy:

The project is a step forward in harnessing the untapped solar potential and further spreading solar technology in the region. It leads to the demonstration of the success of solar projects in the region, which motivates investors to invest in similar projects.

### Decent work and economic growth:

The project activity provides employment opportunities for the local population during the construction, commissioning and maintenance of the solar power project.

### Climate action:

Solar energy is one of the cleanest renewable energies and does not require fossil fuels. No greenhouse gas emissions are produced, which is why approx. 308,687 tCO<sub>2</sub>e can be saved per year.
